FDM

Michael Tsz Fung Poon

Skills Lab Consultant | Software Engineering

A CUHK Computer Engineering graduate and Software Developer with commercial experience in dynamic Web Development, specializing in React.js, Next.js, and Python. Planned and developed a Web Application

Experience

Digital Product Analysis / Developer

HSBC **Sep 2025 – Feb 2026**

Worked as a Digital BA and Developer within an Agile Scrum team to deliver enhancements across internal digital banking platforms

- Developed / resolved production defects including upload duplication automation flow issues and validation rule enhancements of low code platform app, improving data integrity and submission control
- Contributed to new feature development such as Demand Intake Form App and Video iFrame integration, supporting system functionality improvements using Microsoft Power App
- Produced API documentation and user guides, managed JIRA tickets, and supported release coordination for several function modules while collaborating with cross-functional teams on system integration

FDM Skills Lab Consultant – Software Engineering

FDM Group, Hong Kong **May 2025 – Present**

Learnt and built AI Coding Assistant Applications using the Agile methodology in a POD Project under the Scrum team structure

- Contributed as a developer in a Scrum team to build a coding assistant tool utilizing Spring Boot, Vue.js, and Ollama, collaborating cross-functionally with business analysts
- Maintained and continuously improved the application by integrating team feedback, showcasing skills in continuous integration, Git, and version control
- Developed a Java-based banking assessment project using OOD principles in a TDD environment, using JUnit for unit testing and Log4j for logging

Software Developer - Internship

KaChick AI Limited **Jun 2022 – Aug 2022**

Developed a web application which ensured a seamless user experience

- Designed and developed a random avatar images generating website using a ReactJS front-end, and a Python Flask API back-end
- Built the front-end of a photo search website using ReactJS and Material-UI, translating UI designers' mock-ups into high fidelity responsive, user-friendly interfaces
- Communicated with the UI designer, back-end developer, and product manager to iteratively enhance website functionality and user experience based on feedback

Key skills

- React.JS, Next.JS
- HTML, CSS
- Python
- Power Apps, Power Automate
- Java
- Git
- Communication
- Leadership

FDM Skills Lab

Software Engineering

FDM Skills Lab, Hong Kong
May 2025 – Aug 2025

Core Subjects

- Agile Methodologies
- Efficiently Prompting AI
- Java Syntax & Semantics
- OOP
- Version Control using GitLab
- SOLID Principles & Design Patterns
- Unit Testing & TDD
- Multithreaded Programming
- Java 8 Features
- Code Quality & SonarLint
- Unix
- SQL

Education

BEng in Computer Engineering

The Chinese University of Hong Kong
Sep 2019 – Jul 2023

Software Engineering, Database Systems, Cloud Computing and storage, Operating System

Languages

Cantonese, English, Mandarin, Japanese

Interests and activities

- Volunteering – Rotaract Club of Lee Woo Sing College; President
- Sport – Rowing team member of Lee Woo Sing College
- Robotic team member of CUHK in ABU Robocon 2022
